

**EVIQ** [www.eviQ.org.au](http://www.eviQ.org.au) eviQ Cancer Treatments Online is a repository of standardised, current, evidence based, peer reviewed information about clinical cancer treatments. Designed by medical oncologists to reduce practice variation, eviQ provides clinicians, primary carers, patients and carers in all clinical and geographical settings with free, 24 hour access to comprehensive, filtered information relevant to the Australian context covering a variety of cancer related topics. The site is for cancer health professionals, those working in the primary care setting, and patients, families and carers

**Melanoma Patients Australia** [www.melanomapatients.org](http://www.melanomapatients.org) Melanoma Patients Australia aims to provide information, inspiration and hope to melanoma patients and their carers and, in doing so, improve the quality and longevity of their lives. The organisation also aims to reduce the incidence and severity of melanoma by advocating the prevention and early detection message and by aiding researchers.' The site provides a website forum for patients, general publications, survivor stories and details of support groups or 'Melanoma Community Hubs' which deliver peer support in Qld, NSW, Victoria, SA and the ACT

**Oncology Social Workers of Australia** [www.oswa.net.au](http://www.oswa.net.au) is a non-profit, incorporated national organisation for the enhancement of psychosocial services to people with cancer and their families. The group promotes networking, education, advocacy, research and resource development. OSWA provides a forum for information, exchange, networking and ready access to resources relevant to their profession. OSWA began as a special interest group of Clinical Oncological Society of Australia (COSA)

**International Lymphoedema Framework** [www.lympho.org](http://www.lympho.org) aims to improve awareness of lymphoedema, share knowledge through an international not-for-profit publications strategy and education programs, promote international collaboration and promote and document best practice. Publications available on the site include the International Lymphoedema Framework (ILF), "Best Practice for the Management of Lymphoedema", "Developing a Lymphoedema Service", "Management of Lymphoedema in Advanced Cancer and Oedema at the End of Life".

**Lymphoedema Association of Queensland** [www.lymphqld.org](http://www.lymphqld.org) This website contains useful information about support groups and local lymphoedema treatment services and the treatments they provide throughout Queensland.

**Lymphoedema Support Network** [www.lymphoedema.org](http://www.lymphoedema.org) This website contains some really useful information for lymphoedema practitioners with any level of knowledge. There are guides about recognising, assessing and treating lymphoedema. This is a UK based site so information about treatment centres is also UK based.

**Cancer learning** [www.cancerlearning.gov.au](http://www.cancerlearning.gov.au) The Cancer Learning site is an initiative of Cancer Australia and aims to consolidate the variety of evidence-based learning activities, resources and information in cancer care available across Australia and overseas; provide an avenue for health professionals, organisations and cancer networks who wish to undertake, build or plan professional development programs and activities in cancer care and enable resources and information to be shared by cancer care providers across Australia. Cancer Learning is designed for health professionals working in cancer care. The site may also provide useful information for consumers and some resources are designed to promote further engagement between consumers and health professionals

**PubMed** [www.ncbi.nlm.nih.gov/sites/entrez](http://www.ncbi.nlm.nih.gov/sites/entrez) PubMed comprises more than 20 million citations for biomedical literature from MEDLINE, life science journals and online books. Citations may include links to full-text content from PubMed Central and publisher websites. This website is useful for allied health practitioners who do not have access to Queensland Health or university resources. Many articles are free.

**CCWLADi program** [www.qheps.health.qld.gov.au/ccld/home.htm](http://www.qheps.health.qld.gov.au/ccld/home.htm) This site provides allied health staff, working within Queensland Health, with updates on upcoming cancer care activities and events, and also with links to online learning and education opportunities. The learning and education links are presented as a 'learning ladder', providing a tiered approach to learning and catering to both the novice and advanced clinician. This site is for both novice and advanced clinician Queensland Health employees.
